--- Protect your prized data with efficient backup, restore, retention, and 'Bare Metal' without all the traditional expense and operational overhead ---

Data Protection (As A Service) --

Starnet's Comprehensive Data Protection Service

The Problem: Tape-Based Data Backup

Tape-based data backup is hugely problematic. The media is suspect. The ability to restore is questionable. Testing data restoral is an operational drain. Backup software licensing is expensive. Maintaining the software is expensive. The complexity of the whole backup environment keeps operational efficiency at bay.

The Solution: Starnet's Data Protection Service

Starnet offers a variety of elegant **Data Protection** solutions right-sized to the customer's specific data protection objectives and budget. All offered as a monthly service meaning limited up-front capital costs and ongoing efforts on the part of the customer's staff.

Starnet monitors and manages all **Data Protection** operations and procedures, collaborating with the customer to design the backup environment to meet the customer's requirements.

All solutions provide for fast disk-to-disk backup, fast message or file-level restore, bare metal management so servers can be restored quickly to like or near-like hardware, in the event of a 'catastrophic' server failure.

Offsite Vaulting Options

Starnet can offer a number of electronic offsite vaulting options:

- Vaulting to Starnet's Phoenix Hosting center
- Vaulting to one of our partner's hosting centers
- Vaulting to a customers backup location

As part of our Data Protection Service offering we'll support any of the 3 options.

What's Included

- Onsite disk backup device installed for immediate file or message-level restoral
- Fast, efficient, managed disk-to-disk backup
- Bare Metal recovery for servers
- Efficient backup for virtualized servers
- Desktop/laptop backup without licensing
- Removable hard disk drive(s) for easy & safe offsite storage
- Starnet oversight of all backup processes
- Onsite Starnet support when needed
- Optional electronic vaulting offsite
